Bill of Data Rights … and Wrongs

1	Good integration strategy makes no barrier to you exercising your right to worry about something else.
2	With good data solutions, the well-regulated back office shall not be infringed.
3	No data will be quartered in multiple-locations with effective back-office integration.
4	Your data will be secure and no violation of its integrity will occur with good data discipline.
5	Data will not incriminate you or put you in jeopardy with good information handling principles.
6	You have the right to speedy data transactions and witness to all actions with good data processing applications.
7	Excessive and cruel costs for data integrity and security shall not be imposed on the back office with a reasoned, practical approach to data solutions.
8	The power to control your data should not be delegated exclusively to the IT vendor but shared with your operations and back office.
9	You have the freedom to let the computer do the work.
10	You have the right to ask "How did that happen?", and the freedom to Automate and not ask again.
